Pricing Solutions

We quote each garment individually. These ranges are here to help you budget early - and to make the process feel simple and predictable.

For an exact quote, we review your sketch/references and reply within **24-48h**.

Currency: EUR (€)

Quote turnaround: 24-48h after we receive complete references

Good to know: Ranges exclude VAT/taxes, materials, shipping, and any third-party costs.

How pricing works (what affects the quote)

Your final price depends on:

• **Complexity:** number of panels/pieces, linings, facings, closures, pockets

• **Construction:** tailoring, asymmetry, deconstruction, special finishing

• **Revisions:** included refinement rounds and design changes

• **Grading:** number of sizes + garment type

• **Sampling:** digital-only vs toile/test sample

• **Timeline:** standard vs priority / rush

Single Style Development (one garment)

Includes (typical):

• 1 base-size **production-ready digital pattern**

• notches, grainlines, labels, and construction markings

• 2 refinement rounds after feedback

• production-ready export (DXF/PLT as agreed)

Complexity tiers (pattern-only, base size)

Every garment is quoted individually. These ranges are for orientation only.

Clean construction | €230-€410 / style

Examples: tees, simple shirts without complex pocket systems, skirts/shorts including simple lining

Structured / shaped construction | from €420 / style

Examples: dresses, trousers, outer layers with more pieces or closures

Tailored & statement pieces | from €750 / style

Examples: tailored jackets and coats, structured blazers, multi-layer builds

Deconstructed / engineered construction | from €1,500 / style

Examples: unusual paneling, asymmetry, unusual construction logic

Technical foundation

Optional setup work for brands that need file intake, alignment with existing references, or a stronger long-term technical system.

• **Technical Setup: €450**

• **Core Collection Foundation: from €1,500**

Grouped development

Project-based development for grouped styles. Base pattern development is included in one base size per style. Grading, technical documentation, sampling, and production support are added only where needed.

Drop

• **Typically covers:** 2-3 styles

• **Typical range: €750-€1,500**

Capsule

• **Typically covers:** 4-10 styles

• **Typical range: €2,450-€5,500**

Collection

• **Typically covers:** 11+ styles

• **Starting point: from €5,800**

Long-term partnerships (reserved capacity)

If you release consistently, we can reserve capacity and keep delivery predictable.

• **Reserved Capacity: €950 / month**

• **Extended Reserved Capacity: €1,850 / month**

• **Production Support: Custom quote / month**

Month-to-month. Paid upfront. Pause anytime. Unusually complex, tailored, or deconstructed work is scoped separately before work begins.

Material & fabric sourcing support

Most clients don't have existing supplier relationships. This service puts our supplier network and years of sourcing relationships to work finding, vetting, and managing the right material partners for your project - offered as a one-time setup or an ongoing monthly service.

• **Establishment (one-time):** requirement gathering, supplier/mill outreach, first swatch rounds, and building your sourcing reference file (vetted suppliers, MOQs, lead times, price bands)

• **Support (monthly, ongoing):** maintaining that sourcing file - status checks, reorder coordination, price/lead-time monitoring, and incremental requests within the established scope

Scope	Establishment (one-time)	Support (monthly)
Small (1-3 materials)	€180-€250	€100-€140
Medium (4-8 materials)	€350-€450	€200-€260
Large (9+ materials)	€600-€800	€350-€450

Order execution (spec confirmation, PO handling, shipment tracking once a supplier is chosen) is quoted separately per order.

Sampling & physical outputs

Digital-only is totally fine. If you want physical validation, we can produce and ship:

Toile / fit sample (muslin, labor): €120-€400

Complex construction / structured mock-up (labor): €190-€600

Small-batch runs: Quoted separately (materials + complexity + quantity)

Add-ons (clear and optional)

- **Grading (full size set, up to 6 sizes): €150-€520**
- **Measurement chart / spec sheet: €50-€150**
- **Tech pack (construction, BOM, trim specs): €250-€450**
- **Print-ready layout / marker: €50-€140**
- **Priority / rush: +15-30%** (depends on deadline)

Revisions & Change Orders (simple and fair)

Included revisions

Refinements to:

- fit + proportion
- placement adjustments
- minor construction clarifications

Change Orders (quoted before we proceed)

Anything that changes the design direction, like:

- adding/removing pocket systems
- collar/hood redesign
- silhouette change
- new seam map / major panel changes
- fabric/structure changes requiring re-engineering

Simple rule: if the design changes materially, we confirm the added scope before doing more work.

What we need to quote accurately (so you get a fixed price)

Send:

- sketch or reference images (front/back if possible)
- fabric type + weight (or best approximation)
- target base size + size range (if grading is needed)
- construction notes (lining, closures, pocket count, finishes)
- deadline + whether sampling is required
- any existing blocks/patterns (if you want us to build from them)

Next step

We'll reply within **24-48h** with a **fixed-fee proposal**, timeline, deliverables, and revision structure.
